Summary

Full-Stack & Frontend Engineer with 4+ years of professional experience in developing scalable and user-centric web applications across Europe and the Middle East.

Strong expertise in React, TypeScript, Node.js, and cloud-based application development.

Started as a Junior Web Developer, progressed through 3 years at Iran's largest EdTech platform (1M+ users), followed by academic relocation to Italy and a Luxoft internship → full-time engineer path.

Experienced in building performant UI components, designing lightweight microservices, and delivering production features in enterprise environments.

Analytical, detail-oriented, and highly collaborative.

Career Break: Relocation to Rhineland-Palatinate, Germany – August 2025

Work Authorization: Fully authorized to work in Germany (no sponsorship required)

Remote Work: Open to remote roles (Global / EU time zones)

Skills

- **Programming Languages:** JavaScript, TypeScript, Python, Java
- **Frontend Technologies:** HTML, CSS, React.js (Custom Hooks, Local Storage, Routing, Navigation, API Integration, Redux, React Query), Vue.js, Angular.js
- **Backend & Full-Stack Development:** Node.js (Middleware, Authentication, Authorization, Structuring, Error Handling, Modules, REST APIs, NPM), Express.js, Nest.JS, WordPress
- **Databases & Cloud:** SQL, NoSQL, AWS, MySQL, SQLite, Cloud Computing, Microservices, Serverless Architectures
- **DevOps & Testing:** CI/CD, Docker, Kubernetes, OpenShift, Git, GitHub, GitHub Actions, Jest, Cypress, E2E Testing, Unit Testing
- **AI & Advanced Backend Development:** AI Application Development with Python and Flask, Django App Development with SQL and Databases

Experience

❖ **Software Engineer**

Luxoft

Torino, Italy

04/2024 – 08/2025

Consulted on full-stack and AI-driven software solutions for enterprise clients, combining scalable cloud architectures, modern JavaScript frameworks, and DevOps automation to deliver high-performance, data-oriented applications.

- Developed new product features for **internal enterprise portals** using **React + TypeScript**, improving **page load time by ~25%**.
- Implemented **Node.js microservices** for **data synchronization**, reducing backend response **latency by 18%**.
- Wrote unit tests (Jest) and **end-to-end tests** (Cypress) increasing test **coverage from 42% → 70%**.
- Contributed to **API redesign**, resulting in 30% improved API stability and fewer **client errors**.
- Assisted DevOps team in **refining CI/CD** workflows and Docker image optimizations, **reducing deployment time** by ~35%.
- Performed code **reviews** and **refactoring** on legacy modules, decreasing **technical debt backlog** by ~20%.

Assisted in developing scalable web solutions that powered Luxoft's client analytics and user-engagement platforms.

- Built a lightweight analytics dashboard using React, displaying live metrics and user data.
- Worked on **API endpoints** with **Node.js** + **Express**.
- Implemented **authentication** and session handling for **internal tools**.
- Fixed **UI bugs** and enhanced accessibility compliance **across multiple pages**.

Worked in the engineering team of Iran's largest educational platform with 1M+ monthly users.

- **Platform Migration: Migrated** major website sections from **WordPress/PHP** → **React**, improving **UX** satisfaction scores by ~60%.
- Built **reusable UI components**, reducing feature development time by 30%.
- Integrated **REST APIs** and collaborated with **backend teams** on **data flows**.
- Optimized frontend performance, reducing average page load time by ~1.4 seconds.
- Implemented **routing, navigation, local storage logic**, and various **dashboard features**.

Delivered websites for local businesses and manufacturers.

- Created 9 websites using **WordPress, HTML, CSS**, and **JavaScript**.
- Added **interactivity** with **arrays, loops**, and **conditions**.
- Used Vue.js, React, and Git/GitHub for dynamic components.

Local design agency offering IT and creative services.

- Provided hardware/software support and basic HTML/CSS updates.
- Learned JavaScript fundamentals and collaborated on simple UI tasks.
- Helped design team convert UI designs into functional code.

Education

Computer Engineering - Bachelor's degree

Politecnico di Torino – Turin, Italy (Sep/2021 – July/2024)

- I specialize in software engineering, web systems, Python, databases, and backend development.
- Completed major academic projects using React, Python (Flask/Django), SQL, and OS fundamentals.

Languages

1. **English:** IELTS Certificate C1-Level
2. **German:** A2 Level
3. **Italian:** Polytechnic University of Turin B1-Level
4. **Persian:** Native

Certificates

- **DevOps and Software Engineering** Professional Certificate ---by: **IBM** (12/2024)
- **Google Project Management** Professional Certificate ---by: **Google** (09/2024)
- **Google Data Analytics** Professional Certificate ---by: **Google** (02/2024)
